Pipe Bushings

Reducing pipe bushings that step a threaded connection down a size for plumbing and industrial piping modifications.

Stainless steel hex-head reducing bushing with male outer thread and female inner thread

Product	Pipe Bushings
Category	Flanges & Fittings
Typical applications	Plumbing, Industrial piping
Brands and sources	Local Saudi suppliers
Supplied from	Riyadh, Saudi Arabia; delivery across the Kingdom
Enquiries	+966 51 076 7420 (phone / WhatsApp) Info@alsafsaafcontracting.com

OVERVIEW

A bushing is a short threaded adapter with a male outside thread and a smaller female inside thread. Screwed into a fitting or valve port, it reduces the connection size in one piece and in less length than a reducing coupling. Hex-head bushings take a wrench on the outside; flush bushings sit inside the port. They are common where instruments, drains and small branches tap into larger threaded fittings.

Al Safsaaf supplies pipe bushings from local Saudi suppliers for plumbing and industrial piping systems, system modifications and maintenance.

Specify the male and female sizes, thread form, material and grade, pattern (hex or flush) and pressure class. Because a bushing introduces a step inside the bore, avoid stacking several to make a large reduction; a single reducer or reducing tee gives a cleaner flow path. Check that the thread forms on the bushing and the mating parts are the same, as BSP and NPT threads will not seal together.

SUPPLY NOTES

- Reduces a threaded port by one step in minimal length
- Hex and flush patterns for external or internal fitting
- Suited to instrument, drain and small branch connections
- Locally sourced for routine maintenance supply

TO CONFIRM AT ENQUIRY

Please state the following so the correct item is quoted:

- Size combinations
- Thread form
- Material grades
- Pressure class

> **About this document.** This datasheet summarises the product range supplied by Al Safsaaf Trading & Contracting Company. It is not a manufacturer's data sheet or a mill test certificate. Material grade, dimensions, pressure class, coating and certification are confirmed in the quotation, and manufacturer documentation and test certificates are supplied with the goods where applicable.
