PRODUCT SUPPLY DATASHEET · FLANGES & FITTINGS

Pipe Nipples

Short male-threaded pipe nipples for connecting fittings securely in plumbing, fire-protection and industrial piping.

Stainless steel pipe nipple threaded at both ends with a plain centre section

Product	Pipe Nipples
Category	Flanges & Fittings
Typical applications	Plumbing, Fire protection, Industrial piping
Brands and sources	GCC approved suppliers
Supplied from	Riyadh, Saudi Arabia; delivery across the Kingdom
Enquiries	+966 51 076 7420 (phone / WhatsApp) Info@alsafsaafcontracting.com

OVERVIEW

A nipple is a short length of pipe threaded at both ends, used to connect two female-threaded fittings or valves, or to extend a connection by a set distance. Close nipples are threaded over their full length; standard nipples have a plain centre for wrench grip; hex nipples carry a central hex. Barrel nipples in longer lengths bridge between equipment and the pipe run.

Al Safsaaf supplies pipe nipples from GCC approved suppliers for plumbing, fire protection and industrial piping, in both new installations and maintenance work.

Specify nominal size, overall length, thread form, material and grade, schedule or wall thickness and pattern (close, standard, hex or barrel). Nipple length is quoted end to end including threads, so check the engagement depth of the mating fittings when sizing. Confirm the finish required, black, galvanised or stainless, against the pipe specification for the system.

SUPPLY NOTES

- Connects female-threaded fittings and valves at a fixed length
- Close, standard, hex and barrel patterns for different gaps
- Used in new installation and maintenance alike
- Sourced from GCC approved suppliers

TO CONFIRM AT ENQUIRY

Please state the following so the correct item is quoted:

- Size and length range
- Thread form
- Material grades
- Schedule or wall thickness
- Finish

> **About this document.** This datasheet summarises the product range supplied by Al Safsaaf Trading & Contracting Company. It is not a manufacturer's data sheet or a mill test certificate. Material grade, dimensions, pressure class, coating and certification are confirmed in the quotation, and manufacturer documentation and test certificates are supplied with the goods where applicable.
