OVERVIEW

Plumbing accessories are the supporting items that turn pipes, fittings and valves into a finished, serviceable installation. Al Safsaaf supplies plumbing accessories for residential, commercial and industrial applications alongside its fittings and valves, so a contractor or maintenance team can complete a water supply or drainage job from a single order.

The accessories are supplied for water supply systems, drainage networks and industrial plumbing, and Al Safsaaf sources them from Crane and GCC approved suppliers. Because the live product page carries the same text as the plumbing valves page, the exact items in this group should be confirmed with the sales team against your bill of quantities.

When ordering accessories, list them against the system they serve: the pipe material and size, the fixtures and equipment being connected, and whether the work is a new installation or a repair. Sending the existing part, a photograph or the manufacturer reference avoids mismatched threads and connections, and grouping accessories with the valves and fittings for the same job keeps deliveries and site storage simple.

SUPPLY NOTES

- Completes water supply and drainage installations
- Suitable for residential, commercial and industrial applications
- Supplied with fittings and valves from one source
- Available for both new installations and maintenance

TO CONFIRM AT ENQUIRY

Please state the following so the correct item is quoted:

- List of accessory items supplied
- Sizes and materials
- Brands and part numbers
- Pressure ratings
- Applicable standards

> **About this document.** This datasheet summarises the product range supplied by Al Safsaaf Trading & Contracting Company. It is not a manufacturer's data sheet or a mill test certificate. Material grade, dimensions, pressure class, coating and certification are confirmed in the quotation, and manufacturer documentation and test certificates are supplied with the goods where applicable.
